SMART navigation™

BUILT AROUND THE 2026/27 GP CONTRACT

"Clinically urgent requests must be dealt with on the same day."

SMARTnavigation is how EMIS practices deliver it.

£1,000 /year | **3 months *free* – Conference Offer**

What is it?

For years, practices have relied on a duty doctor to handle same day demand — a model that's no longer sustainable. Receptionists are the first point of contact but are left making clinical decisions without enough support. SMARTnavigation fixes this.

SMARTnavigation guides patients through GP-designed, condition-specific pathways and supports automatic write-back into the clinical record. This reduces admin, improves triage accuracy, and helps practices manage demand more safely and efficiently.

12-MONTH CASE STUDY

April 2024 – March 2025 • 17 practices • 152,508 patients triaged

47%

of patients safely redirected away from the GP

15%	12%	11%	9%
eConsultations	Community Pharmacy	Other clinicians (Nurse, HCA)	A&E / WIC

How it works

Age Triage
Scripts adapt questions to the patient's age.

Red Flag Screening
Condition-specific red flags guide patients away from Primary Care.

Same Day Triage
Books patients into same-day slots using condition-specific questions.

Pharmacy First
Filters patients into bookable pharmacist slots to prevent looping.
