SMART navigation™

EMIS Partner API — Fully Integrated

CASE STUDY

Real-world impact across 40+ practices nationally

43%

reduction in receptionist call handling time

Barnstaple to Newcastle — from Leeds to 40+ nationally

£4.7M	285/wk	£300K
NHS savings in 12 months	GP appointments freed up	Saved per practice per year

Overview

AI-led patient triage

Patients speak directly to the system which guides them through safe, clinician-designed navigation questions.

Reduce reception pressure

Free staff from lengthy triage calls. 71 hours of GP time saved every week across practices.

Consistent, structured outcomes

Every patient assessed using the same safe pathways, aligned with NICE guidance.

Built for NHS primary care

Designed around real GP workflows. Pathways reviewed by GP clinical leads.

EMIS Partner API integration

Seamless integration with clinical systems. Triage data uploaded into patient records.

Safer triage. Less pressure on your practice.
